WORK EXPERIENCE

University of North Texas

May 2025 – May 2026

Teaching Assistant

Denton, TX

- Supported instruction for **200+ students** across Python, SQL, and analytics coursework, leading weekly labs and one-on-one sessions that resolved 300+ technical and conceptual queries.
- Collaborated weekly with faculty on rubrics and assessments, built instructional lab videos, and imported exam content using **Respondus 4.0** to streamline course delivery.

AriesView

June 2025 – August 2025

AI Research and Engineering

Remote

- Automated lease abstraction and underwriting workflows by **building production-ready AI pipelines** using OCR, LLMs, and **Retrieval-Augmented Generation (RAG)** to extract structured data from complex commercial real estate documents.
- Designed **evaluation and testing frameworks** to verify model outputs against defined requirements, applying adaptive prompt engineering to improve extraction accuracy.
- Led end-to-end delivery of a core platform feature** across backend, frontend, and database layers by managing a **10-member cross-functional team** and designing scalable system architecture, financial computation logic, and data models.

Dallas AI

June 2025 – August 2025

Summer Research Program

Dallas, TX

- Built **FirstVox**, a secure on-premise real-time translation system for **911 dispatchers**, architecting an end-to-end audio pipeline with **OpenAI Whisper** for transcription and **Meta SeamlessM4T** for translation and speech synthesis.
- Routed live call audio through a virtual audio device with **zero external network dependency** for full privacy compliance, optimizing for low latency under emergency-call reliability constraints, and delivered a production-ready system in 8 weeks with a 5-person cross-functional team.

Capgemini

June 2023 – August 2024

Associate I - Software Engineer

India

- Achieved **100 percent accuracy** in loading data into the **target database**, as measured by successful pipeline execution and validation checks, by building SQL stored procedures and SSIS pipelines for employee data ingestion.
- Performed data cleaning, validation, and reconciliation across multiple source systems, raising data quality to **99%+** for downstream analytics.
- Improved accuracy and reliability of the employee attendance system, as measured by reduced validation errors across multiple user roles, by validating attendance, leave types, and access workflows for employees, managers, and supervisors.

PROJECTS

Frontline Forecast – Hospital Length-of-Stay Prediction (SAS Curiosity Cup)

Feb 2026 – Apr 2026

- Built a predictive model and data pipeline on a **101,766-row** healthcare dataset spanning **130 hospitals** using SQL and **SAS Viya** as part of a 4-person team.
- Translated model outputs into operational recommendations via what-if simulations, showing that earlier discharge for 10% of patients could **free 8–12 beds per day**.
- Selected as **1 of 6 student teams worldwide** for the “Rising Stars in Data and AI” showcase and presented at **SAS Innovate 2026**.

SURAKSHA – AI-Driven IT Support and Task Automation (2nd Prize, AIS 2025)

Jan 2025 – Mar 2025

- Qualified through 25+ teams within the university, was **selected as a finalist at the AIS 2025 Conference**, and **won 2nd prize** for delivering a scalable AI system with self-healing mechanisms and automated ticketing workflows.
- Built and deployed an intelligent chatbot using **LangChain** and **Anthropic Claude**, applying conversational context and tool-based reasoning for incident management.
- Integrated the **Model Context Protocol (MCP)** with **SolarWinds Service Desk APIs** to enable real-time, autonomous execution of IT operations via natural language input.

Echoes of the Unheard – Agentic Voice AI for Missed Call Prioritization

Aug 2025 – May 2026

- Built an **agentic AI framework** converting missed calls into ranked follow-up actions, using speech-to-text and LLM-based signal extraction to score calls on sentiment, urgency, and expected business value.
- Applied a multi-criteria decision model to prioritize callbacks and surfaced results through a dynamic dashboard built with Python and SQL; **presented at the SWDSI 2026 Conference**.

HCA Healthcare Resilience Platform (Top 6 Nationwide)	Jan 2025 – Mar 2025
- Competed against 25+ teams within the university and advanced to the Top 6 nationwide as a finalist in the AIS Student Chapter Leadership Conference (SCLC) HCA Healthcare Challenge. - Analyzed 200,000+ rows of deidentified employee data, performed hypothesis validation, optimized resource allocation, and created visualization charts to support decision-making.	
Snowflake Platform Evaluation – Wisdom Index Advisors (MS Capstone)	Jan 2026 – May 2026
- Evaluated Snowflake as a cloud data platform for a wealth management client, delivering a solution architecture covering data ingestion, storage, processing, and real-time dashboards for advisors and clients. - Built tiered cost models across pilot, small-scale, and enterprise deployment scenarios and presented findings and a platform recommendation to client leadership in person.	
PEAR – AI-Powered Founder–Investor Matching Platform (3rd Place)	Mar 2026 – Apr 2026
- Built an AI-powered platform connecting early-stage startups with relevant pre-seed and seed investors during the 5-week Prompt Engineers AI Spring 2026 Hackathon. - Designed the prompt engineering and matching pipeline using generative AI techniques and managed the platform’s database architecture, securing 3rd place out of 18 teams.	

TECHNICAL SKILLS

AI & Machine Learning: Large Language Models (LLMs), Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Model Context Protocol (MCP), LangChain, Scikit-learn, Feature Engineering, Model Evaluation
Statistics & Modeling: Regression, Classification, Predictive Modeling, Hypothesis Testing, Exploratory Data Analysis, Sentiment Analysis
Data & Analytics: SQL, Python, SAS Viya, Data Cleaning, Data Preprocessing, Data Manipulation, Data Modeling, Data Validation, Data Quality, Data Migration
Databases, Platforms & Tools: Oracle, SQL Server, Salesforce, Azure, Google Cloud, Linux, SSH, Git, HTML, CSS, Agile Methodologies
BI & Visualization: Tableau, Power BI, Alteryx, Excel, Sigma Computing, Dashboard Design, Data Visualization
Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Plotly

RESEARCH & RECOGNITION

Publication: “SURAKSHA: AI-Driven IT Support and Automation,” <i>Information Systems Student Research Journal</i> , Vol. 2, Innovation Snapshot 4 (2025).
Conference: “Echoes of the Unheard: An Agentic Voice AI Framework for Small-Business Missed Call Prioritization,” Southwest Decision Sciences Institute (SWDSI) 2026 Conference, Federation of Business Disciplines.
Awards: Top 6 Worldwide, AIS SCLC 2026 (Microsoft & James Elliott Cybersecurity Challenge) Top 6 Nationwide, HCA Healthcare Analytics Challenge 2nd Place, AIS SCLC 2025 (Southern Company Challenge) 3rd Place, Prompt Engineers AI Spring 2026 Hackathon.
Certifications: SQL (Intermediate) – HackerRank Verified CodePath.org Foundations of AI Engineering 2025 SAS Hackathon Participant McKinsey.org Forward Program.

EDUCATION

University of North Texas, Denton, TX	May 2026
<i>Master of Science in Information Systems & Technologies</i>	<i>GPA: 3.6/4</i>
Amrita Vishwa Vidyapeetham, India	June 2023
<i>Bachelor of Technology in Computer Science Engineering</i>	<i>GPA: 7.02/10</i>

LEADERSHIP EXPERIENCE

Association for Information Systems	April 2025 – May 2026
<i>Graduate Chair</i>	<i>Denton, TX</i>
- Served as liaison between graduate students, AIS leadership, and faculty, representing member interests and organizing events tailored to graduate students. - Shared internship, research, and conference opportunities, aligning communication with academic and organizational goals through collaboration with faculty and officers.	
Business Analytics Club	April 2025 – May 2026
<i>Vice President</i>	<i>Denton, TX</i>
- Led planning and execution of the UNT Sports Analytics Hackathon 2025 (95+ students, 34 teams), coordinating officers, sponsors, faculty advisors, and industry partners. - Hosted speaker sessions on analytics and BI tools including Alteryx, bridging classroom knowledge with applied data science.
